## MERN STACK DEVELOPER

I'm a passionate **MERN Stack Developer** with a strong foundation in **MongoDB**, **Express.js**, **React.js**, and **Node.js**. I enjoy building responsive and user-friendly **web applications**, integrating **front-end** and **back-end** logic smoothly. I have good hands-on experience with **JavaScript**, **HTML**, **CSS**, and **Tailwind CSS**, along with knowledge of **RESTful APIs** and deployment on platforms like **Netlify** and **Vercel**. I have successfully completed a certified **MERN Stack course** from Error Makes Clever (**EMC**).

## SKILLS

### Front-End Development

- Languages : HTML, CSS, JavaScript
- Libraries : React.js, Tailwind CSS, Redux, Daisy UI

### Back-End Development

- Libraries & Tools : Node.js, Express.js
- APIs : RESTful APIs

### Version Control

- Git,GitHub

### Database

- MongoDB

### Others

- Agile Methodologies, Debugging, API Integration
- Fast learning, Problem Solving, Creative approach

## PROJECTS

- PORTFOLIO** : I developed a personal portfolio website using the **MERN stack** with smooth animations and a responsive design. The frontend is built in **React.js**, and I used **Context API** for managing data. All project details and content are stored and fetched from **MongoDB** through a custom **Node.js** backend.
- BULK MAILER** : I built a Bulk Mail Application using the **MERN stack** and BulkMailer to send **multiple emails** with unique data to many recipients at once. The app uses **React.js** for the frontend and **Node.js** with **Express** for backend processing. All email history and user details are **securely** stored in **MongoDB**, improving my skills in **API handling** and backend integration.
- LOGIN AUTHENTICATION** : I built a Netflix-style Login and Signup page using the **MERN stack** with **Firebase Gmail Authentication**, featuring a **responsive UI** similar to Netflix. User data and sessions are securely managed through **Node.js**, **Express**, and **MongoDB**, enhancing my skills in authentication flow and UI design.
- WEATHER APP** : I developed a Weather App using **React.js** and a **Weather API** that displays real-time data with dynamic backgrounds, sunrise/sunset animations, and responsive UI — improving my **API handling**, React design, and **animation skills**.
- MOVIE APP** : I built a Movie App using **React.js** and a **Movie API** to show trending films with a modern, **responsive UI**. Added features like search, pagination, wishlist, and poster download, enhancing my React, **API integration**, and UI design skills.
- and 15+ projects

## EDUCATION

Bharathidasan University, St.joseph's College  
Bsc.Physics

July 2023 – May 2025  
Paramakudi

Alagappa University Government Arts College  
Msc.Electronics

July 2020 – May 2023  
Trichy

## CERTIFICATION

Error makes clever certified **MERN Stack Developer**  
Free code camp certified **Legacy JavaScript Algorithms and Data Structures**  
Freecodecampcertified **ResponsiveWebDesign**  
Uniq Technology certified **React Developer**
